$$\forall \gamma \in \mathcal{F}(M), \ \|\gamma\| \leq C \sup_{f \in B_{\mathcal{S}}} |\langle f, \gamma \rangle|.$$

# Proposition (Weaver/Dalet)

i) Let (K, d) be a compact metric space then

 $lip_0(K)$  S.P.U.  $\Leftrightarrow$   $lip_0(K)^* = \mathcal{F}(K)$ .

ii) Let (M, d) be a proper metric space then

 $S_0(M)$   $S.P.U. \Leftrightarrow S_0(M)^* = \mathcal{F}(M).$

$$\mathcal{F}(M_p^n) = S_0(M_p^n)^*$$

# Corollary (P.)

Then for every  $\varepsilon > 0$ , there exist  $(E_n)_n$  a sequence of finite dimensional subspaces of  $\mathcal{F}(M_p^n)$  such that  $\mathcal{F}(M_p^n) \underset{1+\varepsilon}{\hookrightarrow} (\sum \oplus_n E_n)_{\ell_1}$ . Moreover the embedding is  $\omega^*$  to  $\omega^*$  continuous.

Study of  $\mathcal{F}(M_p^n)$  and  $\mathcal{F}(M_p)$ 

$$\mathcal{F}(M_p^n) = S_0(M_p^n)^*$$

# Corollary (P.)

Then for every  $\varepsilon > 0$ , there exist  $(E_n)_n$  a sequence of finite dimensional subspaces of  $\mathcal{F}(M_p^n)$  such that  $\mathcal{F}(M_p^n) \underset{1+\varepsilon}{\hookrightarrow} (\sum \oplus_n E_n)_{\ell_1}$ . Moreover the embedding is  $\omega^*$  to  $\omega^*$  continuous.

Those two results remain true for every finite dimensional p-Banach spaces. Moreover we have the following.

Around some  $\ell_1$  properties

Study of  $\mathcal{F}(M_p^n)$  and  $\mathcal{F}(M_p)$ 

$$\mathcal{F}(M_p^n)=S_0(M_p^n)^*$$

# Corollary (P.)

Then for every  $\varepsilon > 0$ , there exist  $(E_n)_n$  a sequence of finite dimensional subspaces of  $\mathcal{F}(M_p^n)$  such that  $\mathcal{F}(M_p^n) \underset{1+\varepsilon}{\hookrightarrow} (\sum \bigoplus_n E_n)_{\ell_1}$ . Moreover the embedding is  $\omega^*$  to  $\omega^*$  continuous.

Those two results remain true for every finite dimensional p-Banach spaces. Moreover we have the following.

# Proposition (P.)

Let  $X_p$  be a p-Banach space which admits a monotone FDD ( $\ell_p$  for example). We denote  $M_p = (X_p, d_p)$ . Then  $lip_0(M)$  is 1-norming and thus  $\mathcal{F}(M_p)$  has the Schur property. Moreover  $\mathcal{F}(M_p)$  has (MAP).
